MEASURING MOISTURE IN COKING COAL

Application Note

SN: 04-001

Customer

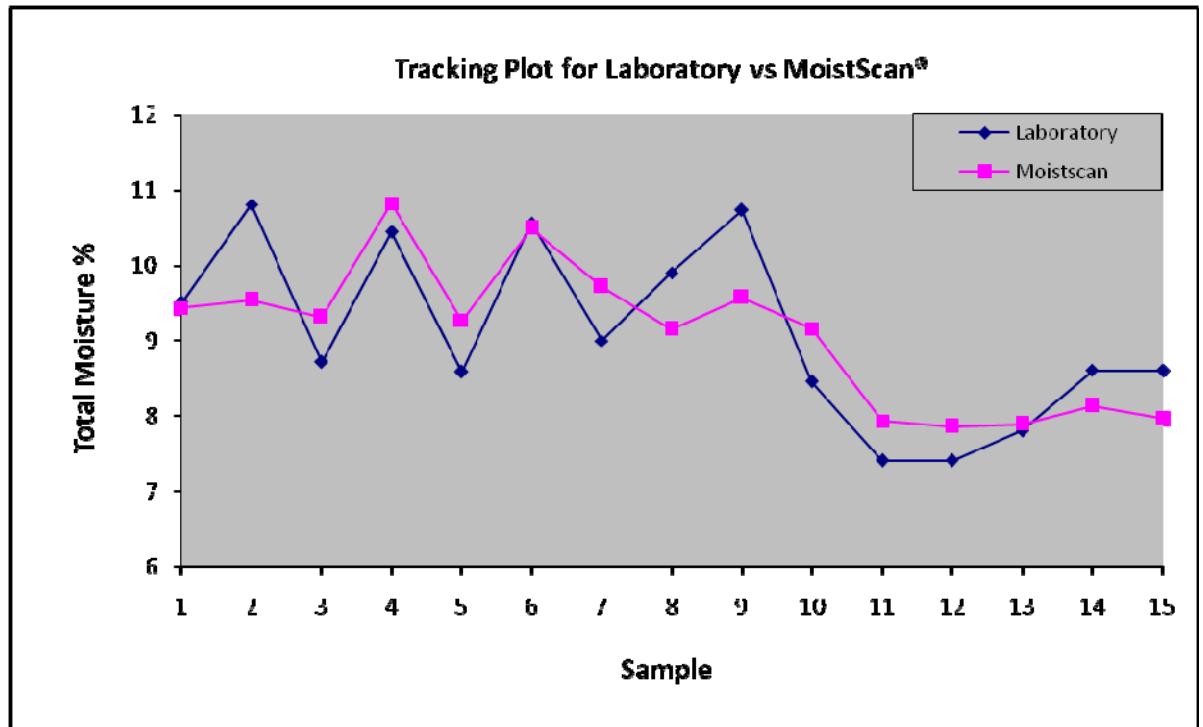

Our customer, based in India is a major coal mine. The customer has washeries, opencast and underground mines on site.

Installation

Two MoistScan® MA-500 online moisture analysers have been installed on conveyors carrying washed product coking coal.

Benefit

MoistScan® provides the client with correct moisture readings to allow them to control the quality of their product for contractual reasons.
